

#### **HOSE CUTTING SHEARS AF98-2015**

Aeroflow hose cuttings shears should be lubricated before each use with WD40 or equivalent. Engine oil can be used if you don't have WD40. Before attempting to use, make sure the bolt and nut on the shears are nice and tight. There should be a small amount of drag when opening and closing the shears this will ensure a nice clean cut every time.
